Achieve Pump Capacity From Draft...

Ball Intake Valve

3.65"
Dia. Waterway

11 psi loss
at 2000 gpm
for 5 inch inlets

- Use with 4, 5 or 6 inch LDH
- Maximum operating pressure is 250 PSI
- Adjustable Pressure Relief Valve
- Only 7 1/2 turns to open
- Hand wheel mounts on either side of the valve
- 30 degree intake elbow swivels 360 degrees

Already Have a Ball Intake Valve?

Shipman's Fire Equipment, Co • (800) 775-7332

TORNADO RC™

Remote Controlled Monitor

Shown with Ultimatic 125 RC Nozzle (not included)

Shown with Max-Matic RC Nozzle (not included)

- Full 2.25" Waterway
- Flow capacity 10 - 500 GPM
- Only 19 psi friction Loss

The Tornado RC and manual Tornado series set the standard for remote control and manual single waterway monitors. The Tornado RC was specifically designed for wildland and crash truck turret applications, ice-control, fixed industrial applications, dust control, arena protection and other unique manual and remote applications. Oscillation and a pre-program stow feature is standard design.

Choose a Nozzle to fit Your Need

Ultimatic 125 RC Nozzle - 10-125 GPM

Mid-Range RC Nozzle - 70-200 GPM

Max Series RC Nozzle - 100-500 GPM

Shipman's Fire Equipment, Co • (800) 775-7332

Remote Controlled 1500 GPM Deck Monitor Designed for Pumper Applications

- Maximum Operating Pressure 200 psi
- 19 psi loss at 1500 gpm
- Factory installed control panel
- Field changeable stops
- Full 450° rotation
- Direct connection to Extend-A-Gun RC
- RC wireless antenna installed

Shown with
Master Stream 1500RC
Nozzle

Shown Installed on an
Extend-A-Gun RC3
with
Master Stream 1500RC Nozzle

EXTEND-A-GUNTM RC

- 3" Remote Controlled Telescoping Waterway
- Raises Monitor 18" for Greater Clearance of Apparatus Equipment
- Firefighter remains off top of engine, in safer operating position

Shipman's Fire Equipment, Co • (800) 775-7332

HURRICANE RC — 300-1250 GPM

When maximum flow and fire stream performance are required, TFT's Hurricane RC remote controlled monitor can provide limited staffing with the ability to apply 1250 gpm remotely. With automatic oscillation, and a pre-program stow feature as standard design, the Hurricane RC and its big brothers, Typhoon RC and Monsoon RC are the perfect choice for your pumping apparatus.

**Full 3" Waterway with 26psi friction loss
at 1250 gpm.**

TYPHOON RC — 300-1500 GPM

When maximum flow and fire stream performance are required, TFT's Typhoon RC remote controlled monitor can provide limited staffing with the ability to apply 1500 gpm remotely. With automatic oscillation, and a pre-program stow feature as standard, the new Typhoon RC and its big brother Monsoon RC are the perfect choice for all your ladder, tower or pumper applications.

**Full 4" Waterway with 19psi friction loss
at 1500 gpm.**

MONSOON RC — 300-2000 GPM

When you need a remote controlled 2000 gpm high clearance monitor designed for Ladder and Tower Applications, look no further than TFT. The Monsoon RC can provide limited staffing with the ability to apply 2000 gpm remotely. With automatic oscillation, and a pre-program stow feature as standard, the Monsoon RC is the perfect choice for your pumping apparatus.

**Full 4" Waterway with 15psi friction loss
at 2000 gpm.**

FIRE EQUIPMENT

172 Cross Road
Waterford, CT 06385
www.shipmans.com

Shipman's Fire Equipment Co., Inc., serving municipal and volunteer fire departments, businesses, and industries in Connecticut, Rhode Island, and southern Massachusetts, has been in existence for over fifty years. Founded by the late Samuel "Sam" Wallace, the business continues to be family owned and operated by his son, Ernest P. Wallace, CEO/Owner. Committed to offering products of the highest quality, at the most reasonable prices, with exceptional service, Shipman's is well known for the knowledge, skill, and ability of its entire customer support, sales, and service staff. Each employee fully understands that reliable customer service is paramount to the continued success of the company. Our personnel consist of active or former career and volunteer fire fighters, fire marshals, and chief officers with hundreds of years of experience in the fire equipment, fire suppression, and fire prevention fields. Shipman's is divided into three major areas of operation consisting of: Fire Equipment Sales & Service; Fire Extinguisher Sales, Service & Inspection; and Fire Apparatus Sales & Service.
